Nowadays, there are some endangered animals around us. It means that we can find only a few of them. Humans destroy the natural homes of the animals in the forests, lakes, and plains. People need more places for living. They cut down trees and destroy lakes. They make homes and roads instead. Then the animals won't have a place to live. The Iranian cheetah lives only in the plains of Iran. Now there are only a few Iranian cheetahs alive. If people take care of them, there is hope for this beautiful animal to live.</p>	I
